

Humidity controls fan coil unit, hydraulic duct connect FCU without electric heaters.

 New generation of FCU with ENERCOV's process algorithm controls. Design for special conditioned space that requires very precise of temperature and humidity to maintain very comfortably, moreover air fresher and healthy breathing.

AHDF Series

ENERCOV air conditioner for humidity control

AHDC series, Air conditioner system for special function room application to maintain environment such as temperature and humidity at desirable range. Chilled water fan coil unit (FCU) is ceiling concealed with ducting installation and connected with proportional type control valve (0-10Vdc). Chilled water supply temperature shall be provided 7.2 deg C or below which is suitable within comfortable range of human being.

Micro-processor controls

Intelligent temperture & humidity controller with ENERCOV's process FUZZY algorithm provides very precise of room parameters. It consists of display unit, temperature & relative humidity sensors, controller and fan motor speed control. LCD display on the display unit shows real time actual temperature and relative humidity.

Display unit functions

Dim : 87Wx87Hx20D mm.
Wall mount

- Heating Element On/Off
- Temperature and Humidity Control Mode
- Cooling Control Mode
- FILTER** Filter Clog Indicator (if applied)
- ALARM** Unit Alarm Indicator
- FAN AUTO** Fan Automatic Control Status Indicator
- PROGM** Programmable Mode
- Actual Room Temperature or Setpoint Indicator
- Actual Room Humidity or Setpoint Indicator
- Fan Speed Running Indicator

Wireless Remote Control

Control Functions

1. Room temp. & humidity are controlled by ENERCOV's process FUZZY/PID adaptive algorithm.
2. Cooling mode and temperature/humidity control mode selectable.
3. Aux HEATER lights up means heater energized.
4. Room temperature and relative humidity real time display
5. Supply air fan can config to vary speed to maintain room condition by automatically.
6. Room sensors faulty alarm codes.
7. Room temperature & humidity sensors calibration is also available.
8. Proportional, integral gain and calculation time are configurable.
9. FCU fan minimum speed is configurable.
10. Alarm display codes.
11. Provide with infrared wireless remote control.
12. Pre-configuration programmable software.
13. Modbus interface port for BAS communication (option).

Network Management by BAS (max 64 IFCs/loop)

AHDF's controller can communicate with BAS or BMS by modbus protocol, max 64 nodes per loop and 300 meters length.

AHDF Series

Operating Mode

- > Cooling Only is a normal room thermostat function. This mode will control room temperature only.
- > Temp & humidity control mode is an ENERCOV's process algorithm to maintain room temperature and humidity automatically.

Temperature and humidity setting

- > Temperature setting
By pressing UP or DOWN key to decrease or increase temperature setpoint by 1.0°C
- > Humidity setting
By pressing 2 configured keypads for 7 seconds and press UP or DOWN key to decrease or increase humidity setpoint by 5%RH (30 - 80%RH adjustable).

Temperature & Humidity displaying

- > Bigger 7 segments LCD will display real time space temperature (deg C)
- > Lower 7 segments LCD will display real time space relative humidity (%rh)

Configuration Mode

Intelligent controller can apply to various application. Each application can access to set up internal programme to config each decision by pressing configuration access keys. This configuration mode includes temperature /humidity sensor calibration, response time setting, minimum/maximum fan speed set up, remote on/off setting, aux. heater setting, etc.

Other Functions

- > Self Diagnostic
- > Watchdog
- > Humidity sensor ERROR code
- > Temperature sensor ERROR code
- > Non-volatile memory
- > Modbus communication to link to other network such as BAS/BMS.

Applications

Application T1 : Proportional control valves (0-10Vdc)

Operating Features & Functions

FUZZY controller adjusts SAF speed automatically

FUZZY controller adjusts CCV opening automatically

CCV operation only can get cooling capacity 0-100%

SAF & CCV operation together to maintain temp. & humidity

SAF minimum speed 10% (configurable)

SAF & CCV are operated on temp. & humidity sensors and setpoint

Temperature control deviation $\pm 1.0/-1.0$ deg C

Humidity control deviation $\pm 10/-10\%$ rh

Application T2 : Proportional control valves (0-10Vdc) W/aux heater

Operating Features & Functions

FUZZY controller adjusts SAF speed automatically

FUZZY controller adjusts CCV opening automatically

CCV operation only can get cooling capacity 0-100%

SAF & CCV operation together to maintain temp. & humidity

SAF minimum speed 10% (configurable)

SAF & CCV are operated on temp. & humidity sensors and setpoint

Temperature control deviation $\pm 1.0/-1.0$ deg C

Humidity control deviation $\pm 5\%$ rh

HT activates during too low temperature at minimum fan speed

Abbreviation
